

Innovative concept of stirrup for young children who can not access to the motorcycle footrest. This item is auto locked and without any bidding. The EASA* stirrup have to be hooked on to the motorcycle seat by 2 claws with an opposite support effect**. The more the child leans on the stirrup, the more the item holds on the seat. It is perfect for a daily utilization in "urban mode" and "long trips": quick set up, easy utilization and compact size.

- 1 Resistance and durability : claw bi-component.
- 2 Adjustable length.
- 3 Mono block stirrups made in high resistant mesh.

* EASA = Etriers Auto-Serrant Amovibles.

** The effort made by the passenger on the left stirrup is transmitted to the right stirrup as support force and vice-versa.

Code : EASA01
 Passenger weight : 30 kg maximum
 Color : Black

ETRIERS EASA is not a permanent retention device as defined in the guidelines and regulations of the EEC and therefore cannot be regulated by EEC homologation. Does not fit all vehicles, including those where it can be in contact with moving parts such as wheels and chains
