

New evolution of the original patented concept S.I.T (Secure Individual Transport) system. Device without permanent fixation that secures children and other light pillion passenger on motorcycles. Ideal for use in "urban mode": rapid implementation and minimal size.

- 1 More comfortable : adjustable belt with lumbar support. Quick lock buckle.
- 2 More efficient: double lumbar support with quick lock buckle. Adjustment of support strap is independant: passenger and pilot.
- 3 Quality non-slip seat : bi-component Neoprene with special surface for the pilot.

Code: PB0102

Waist : Adjustable from 60 to 110cm

Color: Grey / Black

- 1 Belt with lumbar support made in high foam density. High resistant fabric. Ideal for small build.
- 2 High quality seat made in bi-component Neoprene with special surface for the pilot. X system for straps for high resistance and optimal support.
- 3 Double adjustment system of support straps. The passenger and the pilot can increase or decrease separately the support strength.
- 4 quick lock buckles made in Polyacetate for an optimum resistance.

Code: PB0102

Waist : Adjustable from 60 to 110cm

Color: Grey / Black
